

**Fall 2017 senior/grad level course**

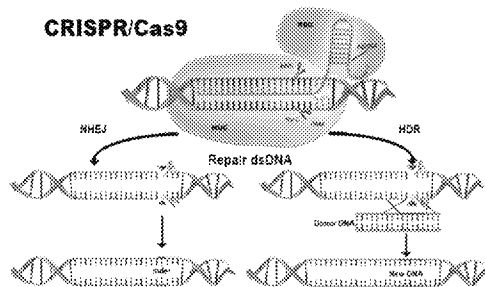

**CS 495/590 Intro to Regulatory Science**

**(Listed as Intro to  
Regulatory Affairs)**

**Offered in classroom and DE**

**Mondays 3pm to 5:45**

**202 Poe Hall**

Interested in a career in regulatory affairs in agriculture? This course will cover the laws, regulations and agencies involved in registration of conventional, biotech and biological crops, crop protectants and growth regulators. US and International laws and regulations will be discussed from technical proof of concept through commercial release. The material covered in this class will be valuable to those seeking employment in industry, whether working directly in regulatory affairs or working indirectly with regulatory affairs. Industry has expressed a desire to hire students with some working knowledge of regulatory affairs. There are also regulatory affairs related careers in governmental agencies such as USDA, EPA and FDA.

This course will feature guest lectures from industry personnel actively working in regulatory affairs.

Non –degree students go to <https://registrar.ncsu.edu/nds/>
